experience

Freelance Graphic and Web Designer (June 2010 – Present)

Wilmington, North Carolina

Following my relocation to Wilmington in 2010, I have been engaged in developing and designing custom websites and printed materials for non-profit, individual, and small business clients in the Wilmington area. Recent design work includes informational sales sheets, company logos, promotional materials, and web development. I work to cultivate strong professional and personal relationships with clients in order to ensure maximum responsiveness to organizational and business development needs.

Server and Bartender (July 2002 – May 2010)

Logan's Roadhouse Incorporated, Barboursville, West Virginia

Prior to and throughout my time at Marshall University I worked within the restaurant industry in nearly every position from dishwasher to training servers and bartenders. During this eight-year period, I learned great patience, teamwork, efficiency, and the ability to simultaneously manage multiple tasks and responsibilities.

Web Development Intern (Fall 2009)

Office of University Communications, Marshall University

Worked as part of a two-person development team to conceptualize, design, and implement a companion website for the University's Fall 2009 television advertising and recruitment campaign. Created graphic interface, HTML and CSS code, and deployed the finished product on the university web server.

Teaching Assistant Internship (Spring 2007)

Department of Information Technology

Marshall Community and Technical College, Huntington, West Virginia
